Dear Guy and Karen,

The Department of Architectural Studies at University of Missouri enthusiastically encourages student internships with Design Vidal's Summer Internship Program. The experience has greatly advanced student portfolio work and can be taken for course credit to benefit these young aspiring professionals. As you know, we have had three students from our CIDA accredited program successfully complete this internship.

The feedback I receive from our students is tremendous resulting in a self-sustaining program because of the word of mouth praise. I recommend this Internship to students wishing to gain first-hand knowledge in the business practice of Interior Design. Furthermore, I appreciate the outstanding opportunities provided to our students and the good communication you provide with our program.

Sincerely,

Ruth Brent Tofle, PhD
Professor and Chair
